

Statement on the Safety of Civilians and Health Care Workers in the Israel & Gaza Conflict

NNPBC echoes the sentiments of our International Council of Nursing colleagues in calling for protection of access to care as well as the safety and security of civilians and health care workers during the conflict in Israel and Gaza.

We are deeply concerned for the innocent people who are suffering during a growing humanitarian crisis and who are unable to access health care services amidst the destruction. NNPBC also recognizes the brave work of health care providers in Israel and Gaza who are providing care and support for people while also living amongst the violence and who are suffering their own enormous losses.
